

**Minder Research, Inc.**, Stuart, Florida, announced at the Florida RV Supershow that they will offer a Seven Year FREE BATTERY Replacement Program for owners of the **TireMinder® Wireless Tire Pressure Monitoring System (TPMS)**.

To be enrolled in the program, TireMinder® TPMS owners simply fill out and return the warranty card. The replacement program allows TPMS owners to send their used lithium transmitter batteries to Minder Research for safe disposal. The company will return an equal number of batteries at no charge.

“This program saves our customers money and protects our environment by facilitating battery recycling and proper disposal of used batteries” said Debbie Druen, President of Minder Research. “This program makes replacing transmitter batteries easy, and we will discard the old ones in an ecologically responsible manner.”

TireMinder® customers who purchased the TPMS system before the free battery program was in place are also eligible.

For more information, or to enroll, please contact Minder Research, Inc at (772) 463-6522 or via email [info@MinderResearch.com](mailto:info@MinderResearch.com).
