

Tire pressure is serious business!  
TireMinder® TPMS is serious peace of mind.

Minder Research, Inc. of Stuart, Florida, presents the **TireMinder®** Tire Pressure Monitoring Systems **TMG400C-4B** and **TMG400C-6** for RVs, 5<sup>th</sup> wheels and motorhomes.

Designed and engineered specifically for RVs, The TireMinder® TPMS is easy to use and install, and monitors up to 22 tires simultaneously on your motorhome and towed vehicle, or your truck and trailer. The TPMS monitors both pressure AND temperature. Visual and audible alarms alert for loss of tire pressure and/or tire temperature over 167°F (BLOW OUT ALARM).

The TireMinder® transmitters may be mounted at any tire location and function 9 to 12 months on *replaceable* CR1632 lithium batteries. The TPMS systems include a hard-wired signal booster to decrease interference from other electronics in the vicinity. Also included are the wireless monitor with multi-angle bracket, 4 or 6 screw-on transmitters, a 12/24 volt car charger and an extra set of batteries.

The TireMinder® TPMS was voted the #1 TPMS in North America by RVers for 2012 and 2013!
